About Us

Forging Group Monale (FGM) was founded in 2009, inheriting **a tradition of excellence in forging and transforming it into an innovative industrial reality.**

With a special focus on aluminum alloys, FGM has rapidly consolidated its position as a leader in the production of forged parts, specifically pistons, a sector in which quality and precision are essential.

HIGH PRECISION

Milestone

2009

Founding of FGM

From the ashes of Officine Meccaniche Sangrato, FGM was born. With a strong heritage in forging, the company resumed production of forged parts made of aluminum alloys while enhancing that of pistons to meet the production needs of the owner, Wössner GmbH.

2011

Technological innovation

Introduction of advanced technologies to improve forging and quality processes. This includes the implementation of stricter quality controls and the adoption of 3D scanning to ensure product accuracy. During the same period, FGM obtained ISO 9001:2018 certification.

2014

Mog 231 Adoption

In order to ensure the maximum safety of personnel working within the production facility, FGM adopted MOG 231. All machinery is up to standard and personnel are trained.

2022

Environment and safety certifications

FGM obtains ISO 14001 and ISO 45001 certifications, demonstrating its commitment to the environment and safety.

2023

Installation of a new automated line

A turning point for the company with the installation of a new automated piston forging line, which allows it to handle mass production with greater efficiency and precision.

2023

Strengthening R&D

The Research and Development (R&D) department is strengthened to further improve the company's know-how and develop new technological solutions in collaboration with customers.

2024

Sustainability projects

The company begins to take some measures to improve sustainability by installing solar panels, integrating sustainable practices in all production processes in order to save valuable resources such as water and energy, and trying to reduce waste. All of this is in an effort to lessen the company's impact on the environment.

2025

Future vision

Looking ahead, FGM aims to become a smarter and more dynamic company by continuing to improve its know-how through R&D.

We aim to provide increasingly comprehensive and high-quality services. In the next 5-10 years, we see ourselves as a more structured organization, aware of its capabilities and able to adapt to continuous changes in the market and the world.

Mission

Offer a unique product in the market, especially for those who need small quantities in production, always striving to create **a trusted partnership with the customer.**

To carry out projects in continuous collaboration through **reduced lead time**, ensuring a **high-quality forged product** with not excessively large shipping lots.

Accepting all projects within our reach, being responsive to meet customers' needs and taking great care of them while maintaining a **humane and personalized approach.**

PRODUCTS AND SERVICES

FGM offers a full range of services for each client project, including:

CUSTOMIZED TECHNICAL CONSULTING

HIGH-PRECISION FORGING

MOLD MAKING

PROCUREMENT OF RAW MATERIAL

FORGING THE PART AND MAKING THE PART

**HEAT TREATMENTS TO IMPART
MECHANICAL PROPERTIES**

PICKLING TO CLEAN THE PARTS

**QUALITY CONTROLS BY MEANS OF LIQUID
PENETRANTS AND 3D SCANS**

**PROVISION OF MECHANICAL, MACRO AND MICRO
TEST REPORTS AT EXTERNAL LABORATORIES**

**SERVICES OF SANDBLASTING,
ANODIZING AND CONTRACT MACHINING**

Our approach has evolved to foster collaboration with customers, with the goal of **achieving the best possible results together**. Recently, we have intensified our research and development (R&D) efforts with selected customers.

Customers and segments

A very diverse clientele, **both domestic and international**, including companies of various sizes needing mass production, prototypes and samples.

Over the years, **demand has grown for higher quality products** to be delivered in increasingly shorter lead times.

Sustainability and social responsibility

FGM is committed to **sustainability**, a key issue in today's world, in which we want to continue to invest. **ISO 9001, ISO 14001 and ISO 45001** certifications, demonstrate our commitment to quality, environmental management, and occupational health and safety.
